PROFESSIONAL SUMMARY

Information Systems student with hands-on experience building SQL queries, reports, and dashboards that support leadership decisions. Skilled in ETL, business intelligence, financial and statistical analysis, and data quality, using Python, SQL, Azure, and Snowflake to turn data from multiple sources into reliable insights.

EDUCATION

Utah Valley University

Bachelor of Science (B.S.), Information Systems.

Orem, Utah

Expected April 2027

EXPERIENCE

Carrier Relations Analyst Intern

August 2026 – Present

Trucordia

Lindon, UT

- Built a state-by-state carrier profitability and forecasting analysis of \$19M+ in premium, policy, and contract data, identifying a 10% profit-sharing agreement against a 15% benchmark and supporting negotiations for stronger carrier terms.
- Compile, clean, and validate data from multiple sources to build Excel reports, dashboards, and leadership presentations supporting carrier and operational decisions.
- Manage operational databases and records, document workflows, and analyze business data to identify process gaps, reporting issues, and opportunities for improvement.

Business Intelligence & Reporting Services Analyst

April 2026 – Present

Utah Valley University

Orem, UT

- Maintain 7+ Power BI reports used by 15 UVU departments, monitoring refreshes, troubleshooting report issues, and coordinating with report owners to confirm ongoing need.
- Write and review advanced SQL queries against Azure SQL databases, analyzing university-wide student, course, enrollment, and survey data to meet reporting requests from 10+ departments while following FERPA and data governance requirements.
- Deployed and validated university-wide SRI student surveys reaching 114,338 students, reviewing data quality, correcting reporting errors, and supporting student feedback reporting for university leadership.

AI Annotator

November 2025 – August 2026

Handshake

Remote

- Reviewed and validated 5,000+ AI-generated data entries using internal AI tools, applying human validation to improve recommendation model accuracy.
- Evaluated behavioral patterns in user-generated data to improve the quality of machine learning training datasets.

PROJECTS

BaerVault

Full-Stack Personal Finance Platform

- Developed and deployed a personal finance platform for household budgeting, cash flow, transaction, and investment tracking, designing the PostgreSQL data model behind it.
- Built and shipped features from concept to production using Next.js, TypeScript, React, Supabase/PostgreSQL, GitHub, and Vercel alongside AI coding agents, validating AI-generated code before release.

GridGuard

TypeScript Web App

- Created a property intelligence platform that transforms geographic and government data into interactive property-level risk analysis for flood, wildfire, wind, and planning scenarios.
- Integrated external data sources and APIs using Next.js, React, TypeScript, FastAPI, Python, Leaflet, GIS services, and Cloudflare Workers.

Business Statistics Analysis

UVU Women's Impact Lab Service Learning Project

- Conducted multivariate statistical analysis of Likert-scale survey data in R Markdown, including regression modeling, hypothesis testing, and data visualization, and delivered a client-ready report to the UVU Women's Impact Lab.

SKILLS

Languages: SQL, Python, R, TypeScript, C#, HTML, CSS

Data & BI Tools: Power BI, Tableau, Excel, Microsoft Azure, Azure SQL Database, Snowflake, Supabase/PostgreSQL

Analytics: ETL Pipelines, Data Analysis, Data Validation & Quality, Financial Analysis & Forecasting, Statistical Modeling, Data Visualization, KPI Reporting, Data Governance (FERPA)

Tools & Workflow: JIRA, Smartsheet, SharePoint, Confluence, GitHub, Vercel, AI coding agents
