PROFESSIONAL SUMMARY

Information Systems student with applied experience in statistical modeling, data pipelines, and analytics, targeting data science roles in finance and healthcare. Skilled in Python, SQL, and R, with hands-on work building BI dashboards, improving data quality, and annotating machine learning datasets. Portfolio of published projects available at github.com/sampbaer-creator.

EDUCATION

Utah Valley University

Bachelor of Science (B.S.), Information Systems

Orem, Utah

Expected April 2027

EXPERIENCE

Business Intelligence & Reporting Services Analyst

April 2026 - Present

Utah Valley University

Orem, UT

- Build and maintain 7+ Power BI reports using data from Azure SQL Database to support reporting needs across 10 UVU departments.
- Maintain UVU's SRI systems and data, investigate reported issues, and respond to requests submitted through the department inbox.
- Developed a five-year Top Courses report identifying the top 30 general education courses and top 50 courses overall using university student data.

AI Annotator

November 2025 - Present

Handshake AI

Remote

- Annotated and validated 5,000+ data entries using internal AI tools to improve recommendation model accuracy.
- Analyzed behavioral patterns in user-generated data to enhance machine learning training datasets.
- Executed data validation and quality audits to reduce classification errors.

Venue Coordinator

August 2023 - October 2025

TheRooftopLehi

Lehi, UT

- Managed scheduling, customer communications, staff onboarding, and AV logistics for 50+ events, improving turnaround time by 35% and setup efficiency by 20%.

PROJECTS

Business Statistics Analysis

UVU Women Impact Lab Service Learning Project

- Applied multivariate statistical analysis in R using R Markdown to Likert-scale survey data, including regression modeling and hypothesis testing.
- Produced a rendered analytical notebook presenting findings, visualizations, and interpretation for a client audience; published to GitHub.

Our Wedding

Azure Web App

- Built and deployed a dynamic Microsoft Azure web application using PHP, HTML, Tailwind CSS, and Azure Cosmos DB (NoSQL); source code published to GitHub.
- Designed an admin view to display live guest response data, demonstrating end-to-end database integration.

WeatherControl

Cross-Platform Weather App

- Developed a cross-platform weather application in C# using .NET MAUI, integrating the OpenWeather API via asynchronous HTTP calls and parsing live JSON responses with Newtonsoft.Json; source code published to GitHub.

SKILLS

Languages & Web: Python, SQL, R, C#, PHP, HTML, CSS

Analytics: Statistical Modeling, Data Analysis, Data Visualization, Data Cleaning, Reporting & Analytics

Data & BI Tools: Power BI, Excel, Microsoft Azure, Azure Cosmos DB

Development Tools: GitHub, .NET MAUI, R Markdown, Tailwind CSS
